introduction this compilation licentiate thesis focuses on open government data ogd the thesis is based on three papers ogd is a system that is organized when publishers collect and share data with users who can unrestrictedly reuse the data in my research i have explored why it can be challenging to cultivate ogd cultivation is human activities that change encourage or guide human organizations towards a higher purpose by changing introducing managing or removing conditions here the higher purpose is ogd to realize believed benefits thus ogd cultivation is an attempt to stimulate actors into organizing as ogd problem and purpose ogd is believed to lead to several benefits however the worldwide ogd movement has slowed down and researchers have noted a lack of use publishers and users are experiencing a set of different impediments that are challenging to solve in previous research there is a need for more knowledge about what can impede the ogd organization cause non valuable organizing or even collapse the organization at the same time there is a lack of knowledge about how impediments shape the organization of ogd this gap can make it hard to solve and overcome the impediments experienced by publishers and users the sought after knowledge can bring some understanding of the current situation of ogd in this research i have viewed the organization of ogd as an ecosystem the purpose of this thesis is to draw lessons about why it can be challenging to cultivate ogd ecosystems by understanding ogd impediments from an ecosystem perspective research design i set out to explore ogd through qualitative research from 2016 to 2018 my research started with a pilot case study that led to three studies the studies are each reported in a paper and the papers form the base of this thesis the first paper aims to stimulate the conceptually oriented discussion about actors roles in ogd by developing a framework that was tested on a swedish public agency the second paper has the purpose of expanding the scope surrounding impediments and was based in a review and systematization of previous research about ogd impediments the third paper presents an exploration of impediments experienced by publishers users and cultivators in the swedish national ogd ecosystem to identify faults from the three papers lessons were drawn in turn and together that are presented in this thesis findings cultivators when cultivating ogd ecosystems are facing towering challenges the following three main challenges are identified in this thesis 1 to cultivate a system that can manage stability by itself without constant involvement 2 to cultivate a system that is capable of evolving towards a greater good

by itself and 3 to have an up to date precise vocabulary for a self evolving system that enables inter subjective understand for coordinating problem solving contribution the theoretical contribution of this thesis is that ogd ecosystems can be viewed as a public utility moreover i recommend that researchers approach the organizing of ogd as the cultivation of evolution rather than the construction of a structure to consider the stability of the system in growth value and participation and to be cautious with how they label and describe ogd actors for actors that are cultivating ogd i recommend that they guide the ogd actors to help them organize view ogd cultivation as the management of evolution growth towards a purpose and view cultivation as a collaborative effort where they can supply ideas technologies practices and expertise
