are you smarter than a fourth grader in math just ask a fourth grader this book is written by a fourth grader for fourth graders sofia ivanka has passion for math that lead to a passion to help other fourth graders with math she wanted to create something simple and straightforward that could be a starting point for practical everyday thinking for every kid the problems reflect friends and food what fourth graders like to think about kids parents and teachers will delight in this practical and helpful approach to understanding math

the debate about the performance of us students on international assessments of educational achievement routinely fails to account for one consistently stark result us achievement is bifurcated between a group of high performing asian and white students and an exceptionally low performing group of black and hispanic students by summarizing results across 20 major international tests conducted since 1995 this research paper shows that when us racial and ethnic groups are separately compared with other countries asian and white students regularly perform at or near the top of international rankings while black and hispanic students typically rank at or near the bottom furthermore the united states has a substantially larger minority population than all other developed countries and minority status is not synonymous with internationally comparable factors such as socioeconomic level or immigrant status the fact that overall us scores are disproportionately influenced by race and ethnicity suggests that researchers and reformers must reconsider how they use and interpret the results of international achievement tests the research paper recommends providing and analyzing cross national data separately by ethnic groups to inform approaches to improving education for all students

in mobilizing the community to help students succeed hugh b price shares the lessons learned while helping to do just that during his tenure as president of the national urban league here find out how educators can apply some of the same tactics to inspire and award academic achievement in even the most challenged school districts using real life examples and shared wisdom from successful educators and community organizers coast to coast price describes ways to create initiatives such as community based honor societies parades and rallies to motivate students and reward achievement include parents in motivational efforts to rekindle students natural curiosity and enthusiasm for learning enlist the support of businesses and other community partners for both financial support and volunteer help maximize use of the media to publicize student accomplishments and set up programs that honor student achievement year round according to price a highly informed and engaged community is essential to closing the achievement gap this book underscores that community based efforts to motivate student

success can be effective because they have been effective the message for educators parents business and civic leaders and members of the general public is that their consistent and creative involvement will result in invigorated youngsters inspired to achieve in school and in life
