understanding causal structure is a central task of human cognition causal learning underpins the development of our concepts and categories our intuitive theories and our capacities for planning imagination and inference during the last few years there has been an interdisciplinary revolution in our understanding of learning and reasoning researchers in philosophy psychology and computation have discovered new mechanisms for learning the

causal structure of the world this new work provides a rigorous formal basis for theory theories of concepts and cognitive development and moreover the causal learning mechanisms it has uncovered go dramatically beyond the traditional mechanisms of both nativist theories such as modularity theories and empiricist ones such as association or connectionism

the purpose of this book is to illustrate the relevance to linguistics today of whitehead s philosophy of organism although largely ignored by linguists whitehead has in fact much to say as regards the cognitive processes underpinning language pattern his theory of symbolism conceives of language as the systematization of expression and relates meaning to feeling in the broadest sense the whiteheadian perspective allows a synthesis of the psychological and the social approaches to language that does not fall into one or another fashionable form of reductionism the volume represents a first application of whitehead s thinking to a broad range of linguistic phenomena ranging from speech act theory to the production and comprehension of texts from language acquisition to historical change and the evolution of language it is argued that whitehead s holistic philosophy is uniquely suited to the view of language as an emergent phenomenon regardless of whether one s approach to cognition is via the nativist or the functionalist route

to be a commonsense realist is to hold that perceptual experience is in general an immediate awareness of mind independent objects and a source of direct knowledge of what such objects are like over the past few centuries this view has faced formidable challenges from epistemology metaphysics and more recently cognitive science however in recent years there has been renewed interest in it due to new work on perceptual consciousness objectivity and causal understanding this volume collects nineteen original essays by leading philosophers and psychologists on these topics questions addressed include what are the commitments of commonsense realism does it entail any particular view of the nature of perceptual experience or any particular view of the epistemology of perceptual knowledge should we think of commonsense realism as a view held by some philosophers or is there a sense in which we are pre theoretically committed to commonsense realism in virtue of the experience we enjoy or the concepts we use or the

explanations we give is commonsense realism defensible and if so how in the face of the formidable criticism it faces specific issues addressed in the philosophical essays include the status of causal requirements on perception the causal role of perceptual experience and the relation between objective perception and causal thinking the scientific essays present a range of perspectives on the development phylogenetic and ontogenetic of the human adult conception of perception
