literary response to the violence pogroms and the relief effort exploring both the poetry of catastrophe and the documentation of catastrophe and care brilliantly weaving together narrative fiction poetry memoirs newspaper articles and documentary harriet murav argues that poets and pogrom investigators were doing more than recording the facts of violence and expressing emotions in response to it they were interrogating what was taking place through a central concept familiar from their everyday lifeworld hefker or abandonment hefker shaped the documentation of catastrophe by jewish investigators at pogrom sites impossibly tasked with producing comprehensive reports of chaos hefker also became a framework for yiddish writers to think through such incomprehensible violence by creating new forms of poetry focusing less on the perpetrators and more on the responses to the pogroms as the dust of the earth offers a fuller understanding of the seismic effects of such organized violence and a moving testimony to the resilience of survivors to process and cope with catastrophe

the science and practice of psychology has evolved around the world on different trajectories and timelines yet with a convergence on the recognition of the need for a human science that can confront the challenges facing the world today few would argue that the standard narrative of the history of psychology has emphasized european and american traditions over others but in today s global culture there is a greater need in psychology for international understanding this volume describes the historical development of psychology in countries throughout the world contributors provide narratives that examine the political and socioeconomic forces that have shaped their nations psychologies each unique story adds another element to our understanding of the history of psychology the chapters in this volume remind us that there are unique contexts and circumstances that influence the ways in which the science and practice of psychology are assimilated into our daily lives making these contexts and circumstances explicit through historical research and writing provides some promise of greater international insight as well as a better understanding of the human condition
