graham webster gives background on britain before the invasion and goes on to describe the roman forces the personalities involved the actual invasion and claudius triumphal entrance into camulodunum the british capital

the purpose of this book is to take what we think we know about the roman conquest of britain from historical sources and compare it with the archaeological evidence which is often contradictory archaeologists and historians all too often work in complete isolation from each other and this book hopes to show the dangers of neglecting either form of evidence in the process it challenges much received wisdom about the history of roman britain birgitta hoffmann tackles the subject by taking a number of major events or episodes such as caesar s incursions claudius invasion boudicca s revolt presenting the accepted narrative as derived from historical sources and then presenting the archaeological evidence for the same the result of this innovative approach is a book full of surprising and controversial conclusions that will appeal to the general reader as well as those studying or teaching courses on ancient history or archaeology

includes pictures includes ancient accounts of britain includes online resources and a bibliography for further reading the romans thinking that it might be some help to the allies britons whom they were forced to abandon constructed a strong stone wall from sea to sea in a straight line between the towns that had been there built for fear of the enemy where severus also had

formerly built a rampart bede's description of hadrian's wall in the middle ages the famous conqueror from the european continent came ashore with thousands of men ready to set up a new kingdom in england the britons had resisted the amphibious invasion from the moment his forces landed but he was able to push forward in a large winter battle the britons large army attacked the invaders but was eventually routed and the conqueror was able to set up a new kingdom over 1 100 years before william the conqueror became the king of england after the battle of hastings julius caesar came saw and conquered part of britannia setting up a roman province with a puppet king in 54 bce in the new province the romans eventually constructed a military outpost overlooking a bridge across the river thames the new outpost was named londinium and it covered just over two dozen acres for most of the past 1 000 years london has been the most dominant city in the world ruling over so much land that it was said the sun never set on the british empire with the possible exception of rome no city has ever been more important or influential than london in human history thus it was only fitting that it was the romans who established london as a prominent city londinium was initially little more than a small military outpost near the northern boundary of the roman province of britannia but its access to the river thames and the north sea made it a valuable location for a port during the middle of the 1st century ce the romans conducted another invasion of the british isles after which londinium began to grow rapidly as the romans stationed legions there to defend against the britons londinium became a thriving international port allowing trade with rome and other cities across the empire by the 2nd century ce londinium was a large roman city with tens of thousands of inhabitants using villas palaces a forum temples and baths the roman governor ruled from the city in a basilica that served as the seat of government what was once a 30 acre outpost now spanned 300 acres and was home to nearly 15 000 people including roman soldiers officials and foreign merchants the romans also built heavy defenses for the city constructing several forts and the massive london wall parts of which are still scattered across the city today ancient roman remains continue to dot london's landscape today reminding everyone that almost a millennium before it became the home of

royalty london was already a center of power the romans were master builders and much of what they built has stood the test of time throughout their vast empire they have left grand structures from the forum and pantheon in rome to the theatres and hippodromes of north africa and the triumphal gates in anatolia and france wherever they went the romans built imposing structures to show their power and ability and one of their most impressive constructions was built on the northernmost fringe of the empire shortly after the emperor hadrian came to power in the early 2nd century ce he decided to seal off scotland from roman britain with an ambitious wall stretching from sea to sea to accomplish this the wall had to be built from the mouth of the river tyne where newcastle stands today 80 roman miles 76 miles or 122 kilometers west to bowness on solway the sheer scale of the job still impresses people today and hadrian s wall has the advantage of being systematically studied and partially restored

first published in 2004 the span of time when most of britain was under roman influence stretched from 55 bc to c ad 500 when control had passed into the hands of germanic peoples many of whom had been living here already for over a century as troops or allies of the roman army five and a half centuries is a considerable portion of our national history if one counts back from today it brings one to about 1440 at the end of the middle ages a period totally remote from our present world this revised edition takes into account aerial archaeology and major rescue excavations

the roman conquest of britain in ad 43 was one of the most important turning points in the history of the british isles it left a legacy still discernible today in the form of archaeological remains road networks land divisions and even language in his much acclaimed trilogy of which this is the first volume now up dated and revised dr webster builds up a fascinating and lively picture of britain in the first century ad and discusses in detail the various types of evidence and the theories based upon them

this book assesses the roman invasion of britain in ad 43 the author challenges the accepted wisdom that the romans landed at richborough in kent he argues for fishbourne in sussex and for a landing to support an already highly romanized way of life

this study locates the main cause for this abiding presence of the british history in its relevance to protestant patriotism

the hero of the story is beric a young briton currently living under roman subjugation after he is raised to the rank of chief among his tribe known as the iceni he and his tribe rise up against roman rule the strong but untrained britons are successful in the beginning of the uprising but are quickly conquered again by the well trained legionaries beric and his small group of men fight to the last conducting a sort of guerrilla warfare finally he and his men are captured and beric is sent to rome as a prisoner gladiator in rome he becomes friends with some people who belong to the rising sect of christians when a christian girl is about to be given to the lions in the roman amphitheater beric dashes to the rescue and kills a lion single handedly

the book opens with a description of the peoples of italy at around the end of the fourth century b c it describes the early success of roman diplomacy and force in creating client populations among the etruscans the latins and the hellenized populations of the south at the beginning of the period the italian peoples sought to preserve their independence and ethnic traditions by its end those who had not achieved roman citizenship were demanding it
